

Opina Argentina

Opina Argentina is a web application that allows users to share their opinions on various topics related to Argentina. This project is built using PHP and MySQL, and it runs on the XAMPP server.

Features

- User registration and authentication
- Post opinions on different topics
- Comment on other users' opinions
- Like and dislike opinions
- User profile management

Installation

1. Clone the repository:

```
git clone https://github.com/yourusername/opinaargentina.git
```

2. Navigate to the project directory:

```
cd opinaargentina
```

3. Start the XAMPP server and ensure Apache and MySQL are running.
4. Import the database:
 - Open phpMyAdmin.
 - Create a new database named `opinaargentina`.
 - Import the `opinaargentina.sql` file located in the `database` directory.
5. Configure the database connection:
 - Open `config.php` and update the database credentials.

Usage

1. Open your web browser and navigate to `http://localhost/opinaargentina`.
2. Register a new account or log in with an existing account.
3. Start sharing your opinions and interacting with other users.

Contributing

We welcome contributions! Please follow these steps to contribute:

1. Fork the repository.
2. Create a new branch:

```
git checkout -b feature-name
```

3. Make your changes and commit them:

```
git commit -m "Description of changes"
```

4. Push to the branch:

```
git push origin feature-name
```

5. Create a pull request.
